Melbourne, VIC | LinkedIn

SUMMARY

Data consultant building production ETL pipelines on SAP HANA for ASX-listed and multinational clients, including a 4,200+ employee payroll migration. Writes complex SQL daily, including multi-source joins, window functions, correlated subqueries and stored procedures. Owns delivery end to end, from source analysis and data modelling through validation, load and post-load reconciliation. Master of Data Science (Monash) with hands-on Python, Power BI, Tableau and React, and a documentation-first approach that gives business and technical stakeholders full traceability of every data transformation.

LANGUAGES & TECHNOLOGIES

- **SQL & Databases:** SAP HANA SQL and SQLScript (stored procedures, window functions, correlated subqueries, complex joins), relational data modelling
- **ETL & Data Engineering:** ETL pipeline design, SAP HANA flowgraphs, staging and control tables, data validation and reconciliation, data masking, source-to-target mapping
- **Programming:** Python (pandas), R
- **BI & Visualisation:** Power BI, Tableau, Excel (advanced)
- **Front-end:** React, JavaScript, HTML, Tailwind CSS
- **Enterprise Platforms:** SAP HANA, SAP SuccessFactors Employee Central

WORK EXPERIENCE

EPI-USE | Southbank, VIC **(June 2025 – Present)**

Technical Data Consultant

- Delivered ETL and data migration across 3 concurrent client engagements in the beverage, healthcare and engineering sectors, moving HR and payroll data from multiple legacy systems into SAP SuccessFactors via SAP HANA.
- Resolved 4,740 conflicting pay-component groups by writing correlated SQL EXISTS checks to detect co-occurring records and a Python (pandas) script to apply corrective flags at scale.
- Protected sensitive employee data by implementing SQL masking for tax file and bank account numbers, verified with per-record PASS/FAIL unit-test queries across 4,000+ records.

***Leading ANZ beverage manufacturer — Data Migration Consultant (Remediation) (*September 2025 – August 2026)**

- Took over a data migration remediation from a third-party vendor that had lost client trust. Led migration of 4,200+ employees' AU and NZ payroll data from ADP and Chris21 into SAP SuccessFactors ahead of go-live.
- Built and tested 20+ SAP HANA flowgraph ETL pipelines covering job, compensation, recurring pay, deductions, payment details and superannuation data, using multi-source joins, UNIONs, CASE logic and window functions.
- Introduced a transformation tracking register documenting 50+ transformation rules end to end (source and target fields, logic, requirement reference, test result), with stage-gate reconciliation and business walkthroughs to rebuild client confidence.
- Validated a 126-field Job Information data specification, correcting picklist mismatches, faulty SQL conditions and mandatory fields lacking source logic. Designed effective-dated, two-record job history logic for NZ employees.
- Ran pre-load validation, post-load reconciliation and delta loads across 5 load cycles, resolving all transformation defects within agreed SLAs.

***ASX-listed health services and distribution group — Data Consultant and Business Analyst (*October 2025 – August 2026)**

- Led migration of 250+ employees from a legacy SAP SuccessFactors instance into the group's consolidated environment, owning transformation build, pre-load validation, data loads and post-load reconciliation.
- Wrote SQL deduplication logic using ROW_NUMBER() OVER (PARTITION BY) to select one primary record per employee across 500+ records, and diagnosed SAP HANA stored procedure errors blocking data extracts.
- Maintained the source-to-target data specification for 8 entities and delivered 4 load cycles to client data SMEs, project managers and delivery managers.
- Translated 4 workshop sessions for a performance and goals module rollout into functional documentation and future-state process maps with full requirement traceability.

***ASX300 engineering services company — Data and Support Consultant (*June 2025 – Present)**

- Built 10+ data transformation flowgraphs during a peak delivery period, advising the client on best-practice transformation design.
- Captured design decisions and action items across 8+ module workshops and contributed to the Solution Design Document.

Fonterra | Richmond, VIC **(December 2023 – February 2024)**

Data Analyst Intern (Monash Industry Team Initiative)

- Raised logistics data accuracy and completeness to 98% by reconciling 500+ shipment records in Excel (XLOOKUP).
- Built a React prototype for shipment planning that reduced planning effort by an estimated 35% in testing.
- Presented a cost-benefit analysis and solution gap assessment to the Executive Leadership Team, evaluating the prototype's business case for wider adoption.

PROJECTS

Internal CV Library and RFP Generator | EPI-USE **(September 2026)**

- Building a React web application backed by a shared database to standardise CVs for 150+ consultants, ingesting existing CVs into a single company-wide format ahead of a regional pilot rollout.

LEADERSHIP

Monash Data Science Society | Clayton, VIC **(September 2023 – December 2024)**

IT and Infrastructure Director

- Led a team of 4 to build the society's website in React and Tailwind CSS, lifting engagement by 30%.
- Designed data capture tools that improved data governance and accessibility for 150+ members.

EDUCATION

Monash University | Master of Data Science **(July 2022 – June 2024)**

Relevant coursework: Data Engineering, Machine Learning, Data Visualisation

Guru Gobind Singh Indraprastha University | Bachelor of Technology, Computer Science **(July 2017 – June 2021)**
